Specification

Vane pump, with integral bypass

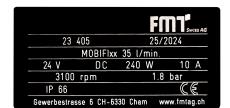

Vanes supported by spring

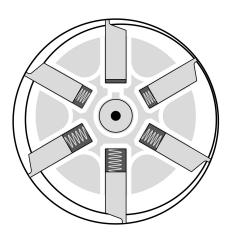

- On/Off switch
- Fuse
- Siphon protection acc. to WHG (German government regulation for environmental care), continuously active

Special notes

- 5 year warranty (excluding wearable parts)
- First class construction of electric machines and pumps
- Continuous operation 3 hours with open valve
- Lapped shaft on the sealing point

the vanes up to 200 °C / 392 °F

- Encapsulation of the electric motor, which, in case of extreme temperature fluctuations, largely prevents the formation of condensed water and of short-circuits resulting thereof
- Switch case freely positionable in all 90° positions
- Switch case made of shock resistant, die-cast zinc, coated by cataphoresis
- Pump case made of seawater resistant die-cast aluminium, coated by cataphoresis
- Motor case, completely galvanised, coated external parts
- Small tolerances provide a high suction- and pressure performance
- Pump case freely positionable in all 90° positions
 The material composition of the vane-stator (runner ring) guarantees form-stability of
- Materials guarantee a low weight and an exceptional lifetime with optimized efficiency
